

March 6, 2024

The Honorable Chuck Schumer
Majority Leader
U.S. Senate
Washington, DC 20510

The Honorable Mitch McConnell
Minority Leader
U.S. Senate
Washington, DC 20510

Dear Majority Leader Schumer and Minority Leader McConnell:

We, the undersigned 1,171 small business owners in all 50 states and the District of Columbia, ask for swift passage of H.R. 7024, the Tax Relief for American Families and Workers Act of 2024, to provide immediate relief from Section 174 amortization before the March 15th tax deadline. We are small technology companies, most with less than \$10 million in annual revenue, and without relief from Section 174 amortization, we face catastrophic financial decisions over the next few weeks. Many of the undersigned small businesses cannot survive another filing season with unprecedented tax bills caused by Section 174 amortization.

In 2022, we were unexpectedly required, for the first time, to amortize research and development (R&D) expenses. For us, these expenses are mostly payroll expenses—namely for our employees. Weathering one year was hard enough, but two could be catastrophic. Last year, we faced difficult choices to pay our tax bills, such as, entering in tax repayment plans, borrowing against our homes, incurring credit card debt, dipping into retirement or savings, freezing hiring, suspending projects, and laying off valuable staff, and unfortunately, a second filing season will have even more draconian results for our businesses, our employees, and our customers. In some cases, this could mean laying off more staff, closing our businesses, or filing bankruptcy.

As [conveyed in our letter from last April](#), we are particularly affected by the amortization of R&D. Immediate relief from Section 174 amortization is critical, as we have limited access to capital, and R&D and “software development” represent a disproportionate amount of our expenses. For decades, companies like ours could immediately deduct our R&D and software development costs, which includes our payroll expenses, but this change in the tax code has hamstrung our ability to innovate, compete, and grow. Since Section 174 amortization took effect, R&D spending nationwide has slowed, turning negative the last two quarters. Simply put, we’re in an R&D recession, and failing to act before March 15th will make this even worse.

We were extremely encouraged by the overwhelming, bipartisan passage of H.R. 7024, the Tax Relief for American Families and Workers Act of 2024, in the House of Representatives nearly five weeks ago. This package is essential to keeping our small businesses alive, and we sincerely ask for your leadership to ensure this bipartisan package becomes law before many of our businesses are required to file taxes on March 15th.

Sincerely,

Alabama
